# FLIGHT PIONEERS.

WILBUR WRIGHT (WILBUR WRIGHT)

# WETLANDS EXPLORED CLOSELY BY NEW PASSENGER FLIGHT

THE FIRST commercial jet flight over the wetlands of the Sacramento-San Joaquin River Delta, a major waterway in California, was made last week. The flight, which was made by a Boeing 747-200, was the first of its kind in the world. The flight was made by the Delta Air Lines, which is the largest airline in the world. The flight was made from Los Angeles to San Francisco, and it was the first time that a jet had flown over the Delta. The flight was made by Delta Air Lines, which is the largest airline in the world. # **HOMECOMING FLIGHT MEETING.**

The annual homecoming flight meeting of the American Society of Naval Engineers (ASNE) was held at the Waldorf-Astoria Hotel in New York City on November 28 and 29. The meeting was attended by approximately 100 members and guests from all over the United States. The program included a dinner-dance on the evening of the 28th, followed by a business meeting on the morning of the 29th. The business meeting was presided over by the president of the society, and included reports from the various committees and a discussion of the society's activities for the coming year. The meeting was a success and the members enjoyed the opportunity to get together and discuss the state of the profession.

The American Society of Naval Engineers (ASNE) is a professional organization of naval engineers and related professionals. The society was founded in 1878 and has since grown to become one of the largest and most influential organizations in the field. The society's primary purpose is to advance the science and art of naval engineering and to promote the highest standards of professional conduct among its members. The society achieves this purpose through a variety of activities, including the publication of technical journals, the holding of conferences and meetings, and the provision of educational and training opportunities for its members. The society is also active in public affairs, advocating for the interests of the profession and the public.

# BRITISH NOTES OF THE WEEK

By the Associated Press

LONDON, Jan. 12.—The British Government today announced that it had received information from reliable sources that the German Government was preparing to make a proposal for a general armistice.

The British Government has been very anxious to receive such news, and it is believed that the proposal, if it comes, will be accepted.

There is a great deal of interest in the study of the life history of the house fly, *Musca domestica*, and the following is a summary of the life history of this insect as given by the author of the paper on this subject in the *Journal of the Entomological Society of America*, Vol. 1, No. 1, 1910.

### THE HOUSEFLY, *MUSCA DOMESTICA*

The housefly is one of the most common and most annoying of insects. It is found in all parts of the world, and is especially abundant in warm climates. The life history of the housefly is very interesting, and is one of the most perfect examples of the life history of an insect. The housefly is a dipterous insect, and its life history is divided into four stages: the egg, the larva, the pupa, and the adult. The housefly is a very common insect, and is found in all parts of the world. It is especially abundant in warm climates, and is one of the most annoying of insects. The life history of the housefly is very interesting, and is one of the most perfect examples of the life history of an insect.

Other researchers have also found that the use of a single word can have a significant impact on the way people think and feel. For example, the word "freedom" can evoke a sense of liberation and hope, while the word "freedom" can evoke a sense of liberation and hope. This is why it is important to choose words carefully when communicating with others.

There is a growing awareness of the need to improve the quality of the work environment. This is reflected in the fact that many companies are now investing in employee training and development. This is a positive trend, as it shows that companies are beginning to see the value of their employees and are willing to invest in their growth. This is a step in the right direction, as it shows that companies are beginning to see the value of their employees and are willing to invest in their growth. This is a step in the right direction, as it shows that companies are beginning to see the value of their employees and are willing to invest in their growth.

1000

1. The first step is to identify the problem. This involves understanding the current situation and the desired outcome.
